

products PRODUCTS AND SERVICES service

Prismo offers a comprehensive range of materials specifically developed for the provision of specialist coloured surfacing for designated bus priority routes.

Prismo has more than fifteen years contracting and manufacturing experience in all types of resin based coloured surfacings manufactured to ISO 9002 quality assurance.

BUSTRACK TX

- Hot screed applied premium quality thermoplastic
- Standard colours: 'Brilliant Green' and 'Standard Red'
- Application onto most substrates including S.M.A.
- All year round application
- Ideal for bus boxes in city areas
- Fast application and turn-round time

BUSTRACK TG

- Pigment epoxy binder and aggregates
- Hand or spray machine applied
- Ideal for heavily trafficked bus lanes
- High impact vivid coloured aggregates
- Brighter coloured as the pigmented colour complements aggregate colour

COLOURED AGGREGATES

Using the latest lead-free pigments and resin coating techniques, Prismo coloured aggregates have better colour stability and performance suitable for today's high traffic volumes. Pigmenting high P.S.V. aggregates which have a natural inherent colour themselves improves uniformity, resulting in less fading and colour loss.
